

Case study: Quick Check iSpot warehouse

Optimization of the warehousing and shipping process

Client

iSpot Apple Premium Reseller is an authorized retail network of Apple brand devices:

- own online store and
- a network of 27 sales outlets in the largest cities in Poland.

iSpot warehouse - approx. 1000 m2 with an active number of SKUs at the level of 3000.

Goal

Reducing the factors causing the extension of the storage and shipping processes and reducing the risk of errors as a preparation of the organization for the implementation of WMS.

Scope

Review and evaluation of warehouse processes and warehouse organization.

Result

- 25 change recommendations and best practice to improve the processes of entry, storage, picking, goods exit and inventory.
- A roadmap of recommended changes, containing mapped activities in three areas (system, processes, infrastructure), planned for four quarters ahead.
